

# CAP1 & CAP2 SERIES

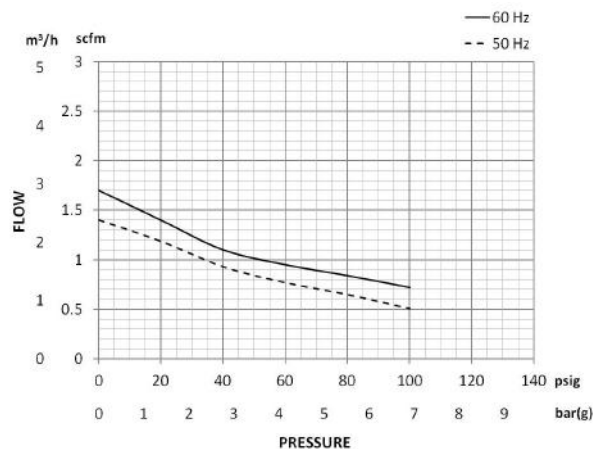

## Commercial & Constant Pressures Applications

### FEATURES

- \* New sleek design
- \* Thermal protection
- \* Quite, sound level less than 65db
- \* Oil-less rocking piston compressor
- \* Thicker valve plate increases strength
- \* Lightweight, full metal body increases overall strength
- \* Sloped head design aids airflow & increases velocity

### PRODUCT PERFORMANCE

CAP1 (115VOLT) CAP2 (230 VOLT)

The CAP Series pumps are designed to perform and built to last. The inherent design of rocking piston technology make it the optimal choice for applications requiring high pressure in a small package. Despite its small size, the versatility of the CAP Pumps means it's the right product to deliver quality air solutions for iron and sulfur removal.
